

Free Glaucoma Screenings

Here's One New Year's Resolution You Should Keep

Free Vision Screening! January is Glaucoma Awareness Month

The Friends Of The Congressional Glaucoma Caucus Foundation is offering free glaucoma screenings in the greater New York City area. Glaucoma is the major cause of preventable blindness in the U.S. Over three million Americans have glaucoma. It shows no symptoms in its early stages. The good news is with early diagnosis and medication it can be easily controlled. We express our thanks and appreciation with our screening partners to be able to offer the following free glaucoma screenings.
